

# AND EXPERIENCE OUR 3D DEMO!

## WHAT YOU NEED FOR 3D AND HOW IT WORKS

3D TV transmits left and right eye images simultaneously.

RIGHT EYE

LEFT EYE

The shutter glasses receive a signal and flicker the left and right lenses on and off alternatively.

The alternate images are displayed at such a high speed that you perceive them as a single 3D image, creating the illusion of depth, space and distance.

## Panasonic

127CM (50") VT20 SERIES  
3D FULL HD PLASMA TV
