WHAT IS IPTV?

IPTV (Internet Protocol TV) allows you to easily access internet content on your TV through a simple, remote control friendly interface.

This is usually done using little programs called "widgets" to help you navigate to the content you want such as news and weather, shopping or videos.

Look for these symbols

It's also great for watching online videos on the big screen with friends and a fantastic way of keeping up with your favourite TV programs through various catch up websites. Come in and talk to our AV experts to get the best advice on a connected TV.

Broadband connection required. Refer to your provider for applicable fees & charges.
